Creighton Model

FertilityCare™ Practitioner Education Program

The CREIGHTON MODEL **FertilityCare** System works cooperatively with a woman's cycle to monitor normal and naturally occurring biological markers that identify the fertile and infertile days in her cycle. The couple uses this information to plan or avoid a pregnancy and to monitor a woman's health. The system is based on respect for the couple, the family, and human life from the moment of conception. The effectiveness to avoid pregnancy is 99% and it is extremely effective in helping couples achieve pregnancy. NaProTechnology, a new reproductive science, based in the CREIGHTON MODEL **FertilityCare** System, provides new hope for couples experiencing infertility.

The **FertilityCare** PRACTITIONER Program prepares students to teach the CREIGHTON MODEL **FertilityCare** System. The program was developed according to basic education principles utilized in allied health courses and consists of:

- Education Phase I
- Supervised Practicum I
- Education Phase II
- Supervised Practicum II
- On Site Visit scheduled during Supervised Practicum II
- National Standardized Final Exam

Costs and Fees

The cost for the entire program is \$3,100 for tuition, \$500 for books/materials fees, and a \$75/day administrative fee. In addition, there are costs associated with an On Site Visit that will be conducted at the student's location during the second Practicum. These costs include travel and hotel room for the student's Supervisor and are payable at the time of the On Site Visit.

Room and board and facility fees are assessed separately and include items such as hotel, food, facility fees, and transportation.

The **FertilityCare** Practitioner Education Program is a program of Natural Choice FertilityCare Services, in partnership with Marguerite d'Youville FertilityCare Services, a program accredited by the American Academy of FertilityCare Professionals that abides by its Code of Ethics and Standards. Upon completion of the Program, the student is eligible to apply for certification through the Academy. See www.aafcp.org.

Also upon completion, the student will be qualified to establish a program that can be an Affiliate of FertilityCare Centers of America. For more information on the Creighton Model **FertilityCare** System, visit www.creightonmodel.com or www.fertilitycare.org.
