

# Creighton Model **FertilityCare™** Practitioner Education Program

The CREIGHTON MODEL **FertilityCare** System works cooperatively with a woman's cycle to monitor normal and naturally occurring biological markers that identify the fertile and infertile days in her cycle. The couple uses this information to plan or avoid a pregnancy and to monitor a woman's health. The system is based on respect for the couple, the family, and human life from the moment of conception. The effectiveness to avoid pregnancy is 99% and it is extremely effective in helping couples achieve pregnancy. NaProTechnology, a new reproductive science, based in the CREIGHTON MODEL **FertilityCare** System, provides new hope for couples experiencing infertility.

The **FertilityCare** PRACTITIONER Program prepares students to teach the CREIGHTON MODEL **FertilityCare** System.

The program was developed according to basic education principles utilized in allied health courses and consists of:

- **Education Phase I**
- **Supervised Practicum I**
- **Education Phase II**
- **Supervised Practicum II**
- **On Site Visit** scheduled during Supervised Practicum II
- **National Standardized Final Exam**

## EDUCATION PHASE I

An eight-day, total immersion educational experience prepares the FertilityCare Practitioner Intern to teach the CREIGHTON MODEL **FertilityCare** System. The curriculum consists of history of natural methods of birth regulation, anatomy and physiology, the hormones of the menstrual cycle, breastfeeding, menopause, psychodynamics of contraception and the CREIGHTON MODEL **FertilityCare** System, human sexuality, the beginnings of human life, and the effectiveness of natural and artificial methods of family planning. The clinical group sessions train the Intern to teach the **FertilityCare** System according to the standardized curriculum and include basic chart reading and correcting, how to conduct the standardized Introductory Session and Follow-Up sessions, documentation, and the Supervised Practicum I Responsibilities. An assessment at the end of this education phase assures the competency of the student to begin teaching clients during his/her internship.

## SUPERVISED PRACTICUM I

This Practicum begins with the successful completion of Education Phase I and ends with Education Phase II. During this Practicum the Intern returns to his/her home and begins teaching the **FertilityCare** System. Every Practitioner Intern will be assigned a Faculty Supervisor with whom they will work closely during their Practicum. The Supervisor provides the support and direction that a Practitioner Intern requires. All books, charts, slides, and teaching materials needed to teach will be provided. Each Intern will teach a minimum of 6 client couples during this Practicum. There are written and recorded assignments, and scheduled telephone calls with the Supervisor.

## EDUCATION PHASE II

Following successful completion of Supervised Practicum I, the intern is qualified to attend Education Phase II. This 6-day educational experience covers advanced case management in infertility, continuous mucus discharge, unusual bleeding, and NaProTechnology. The conduct of pregnancy evaluations is also taught along with management of advanced behavioral issues, communication, marketing, and advanced business aspects of managing a **FertilityCare** Center. An Oral Exam at the end of Education Phase II helps to prepare the intern for his/her second supervised practicum.

## SUPERVISED PRACTICUM II

Supervised Practicum II begins with the successful completion of Education Phase II and ends with the Final Exam. During this time, the Intern will teach an additional 12 client couples, submit assignments, have monthly phone calls with their Supervisor, and experience an On Site Visit from their Supervisor.

## ON SITE VISIT

The On Site Visit is a time when the Faculty Supervisor will go to the intern's home location and observe his/her teaching, review his/her files, and conduct a comprehensive case review of all the intern's clients. The student covers the cost of the On Site Visit.

## NATIONAL STANDARDIZED FINAL EXAM

When all the requirements are complete, the Intern will be given approval to take a national standardized final exam. This exam is proctored in the student's home location and is offered four times a year.

## Applicant Eligibility

Those eligible for the **FertilityCare** Practitioner Program are registered nurses with current licenses, allied health professionals with a BA or BS degree in health, behavioral sciences, social sciences, or education. Other non-health fields are also individually recognized. Also eligible are persons with associate degree/diploma such as: licensed practical nurse, human services practitioner, or the equivalent of two years of college study. Further eligibility criteria: that the applicant practices the CREIGHTON MODEL **FertilityCare**

Practitioner or, if single and celibate, monitor their natural fertility and be a philosophical acceptor of the System.

## Costs and Fees

The cost for the entire program is \$3,100 for tuition, \$500 for books/materials fees, and a \$75/day administrative fee. In addition, there are costs associated with an On Site Visit that will be conducted at the student's location during the second Practicum. These costs include travel and hotel room for the student's Supervisor and are payable at the time of the On Site Visit.

Room and board and facility fees are assessed separately and include items such as hotel, food, facility fees, and transportation.

The **FertilityCare** Practitioner Education Program is a program of Natural Choice FertilityCare Services, in partnership with Marguerite d'Youville FertilityCare Services, a program accredited by the American Academy of FertilityCare Professionals that abides by its Code of Ethics and Standards. Upon completion of the Program, the student is eligible to apply for certification through the Academy. See [www.aafcp.org](http://www.aafcp.org).

Also upon completion, the student will be qualified to establish a program that can be an Affiliate of FertilityCare Centers of America For more information on the Creighton Model FertilityCare System, visit [www.creightonmodel.com](http://www.creightonmodel.com) or [www.fertilitycare.org](http://www.fertilitycare.org).
